

Taking Care of Land, Water, Air, and our Resources

Catherine Demmerle
Heathwood Hall Episcopal School, Columbia SC
March 6, 2008

We constantly waste precious resources and dump our trash into unnecessary landfills.

Paper, plastics, glass, cardboard, and metals are used only once and then thrown away.

What can we do differently?

By reusing and recycling materials, we can:

- Preserve Nature
- Reduce pollution of air and water
- Save energy
- And optimize the use of raw materials,

Thus not wasting these valuable resources.

Waste is Bad Taste
